

2 Interactions Found
See details below.

Patient Regimen

- aspirin**
- acetylsalicylic acid
- captopril**

Serious - Use Alternative

- **aspirin + captopril**
- aspirin, captopril. pharmacodynamic antagonism. Avoid or Use Alternate Drug. Coadministration may result in a significant decrease in renal function. NSAIDs may diminish the antihypertensive effect of ACE inhibitors. The mechanism of these interactions is likely related to the ability of NSAIDs to reduce the synthesis of vasodilating renal prostaglandins.

Monitor Closely

- **captopril + aspirin**
- captopril, aspirin. Either increases toxicity of the other by Other (see comment). Use Caution/Monitor. Comment: May result in renal function deterioration, particularly with high dose aspirin, elderly or volume depleted individuals.
